SUMMARY

Data Scientist with experience in machine learning, data cleaning, computer vision, web scraping, and applied analytics using Python, SQL, Scikit-learn, TensorFlow/Keras, and PyTorch. Skilled at building predictive models, automating data workflows, and translating complex datasets into business and research insights.

EDUCATION

Thunderbird School of Global Management

Masters in Global Management, Data Science Concentration

Phoenix, AZ

Jan 2024 – Dec 2025

Andhra University

Bachelors in Electronics , Minor in Data Science

India

Aug. 2019 – May 2023

TECHNICAL SKILLS

Languages: Python, SQL, R

Machine Learning: Scikit-learn, XGBoost, SMOTE, TensorFlow, PyTorch, Keras, CNNs, Transfer Learning

Data Analysis: Pandas, NumPy, SciPy, Feature Engineering, Data Cleaning, Model Evaluation

Tools: Excel, Power BI, Tableau, PostgreSQL, MySQL, Git, GitHub, Jupyter, Colab, Streamlit, Linux, HPC/Slurm

PROJECTS

Rubiverse: AI-Powered Digital Twin | *Python, OpenAI API, RAG, Streamlit, NumPy*

- Built an AI-powered chatbot that uses OpenAI embeddings and cosine-similarity search to retrieve relevant information from a personalized knowledge base and answer recruiter questions accurately.
- Developed recruiter-aware features including role-specific response adaptation, automated resume delivery through email, conversation logging, and a password-protected analytics dashboard; deployed the application through Streamlit.

Retail Stockout Risk Prediction | *Python, Excel, Predictive Analytics, Business Intelligence*

- Analyzed inventory, demand forecast, pricing, promotion, weather, and seasonal data to identify product-level stockout risks, demand patterns, and operational drivers.
- Translated stockout patterns into inventory-planning insights and improved stockout-case recall from 0.2% to approximately 90%, helping prioritize high-risk products.

EXPERIENCE

Curriculum Analyst

Arizona State University

Aug 2025 – Present

Tempe, AZ

- Reviewed and validated 3,000+ course records, ensuring data accuracy, compliance, and consistency across academic transfer-credit workflows.
- Analyzed academic records and evaluation data to identify inconsistencies, support workflow accuracy, and improve data quality across student record systems.

Data Analyst

Innovate Europe Foundation

Oct 2025 – Dec 2025

Berlin, Germany

- Built a data-driven cost comparison model across EU cloud providers and U.S. hyperscalers, evaluating cost, scalability, compliance, and strategic trade-offs.
- Conducted market, policy, and competitor analysis across Europe's digital sovereignty landscape to support stakeholder reporting and cloud infrastructure recommendations.

Artificial Intelligence Research Fellow

Arizona State University

May 2025 – Aug 2025

Phoenix, AZ

- Built a Python-based data collection workflow to extract, clean, and structure 8,000+ app-level records for large-scale market and research analysis.
- Documented data schemas, collection logic, and analytical workflows to improve reproducibility, reporting accuracy, and data quality.

Data Analyst, Volunteer

SUG Creative

Nov 2021 – Apr 2023

India

- Analyzed enrollment and funding data from 50 local schools and created 15+ reports and visualizations to support leadership decisions and stakeholder reporting.
